

DAA-X

D-ASPARTIC ACID FORMULA

ADVANCED
MULTI-COMPLEX
OF DAA

- DAA
- N,N-DIMETHYLGLYCINE
- ZINC
- PANTOTHENIC ACID

DESCRIPTION

DAA-X is a multi-complex of D-aspartic acid, N,N- Dimethylglycine, zinc and pantothenic acid.

D-Aspartic acid is a physiological amino acid that occurs mainly in the pituitary gland and testes and has a role in regulating the release and synthesis of LH and testosterone in humans.

Dimethylglycine (DMG) is a derivative of the amino acid glycine found in the cells of all plants and animals and can be obtained in the diet in small amounts from grains and meat. Dimethylglycine was popular among Russian athletes and cosmonauts.

*Zinc has been added that contributes to the maintenance of normal testosterone levels in the blood, to normal fertility and reproduction and to normal protein synthesis. *Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters and to the reduction of tiredness and fatigue.

DAA-X is a product with ingredients that are widely used by athletes who want to use scientifically tested legal products.

** These statements have been authorized by the European Commission.*

DIRECTIONS

Take one daily dose (4 capsules). Take 2 capsules in the morning and 2 in the evening.

INGREDIENTS

D-aspartic acid, capsule [glazing agent (hydroxypropyl-methyl-cellulose), colour (titanium dioxide)], N,N-Dimetilglycine hydrochloride, anti-caking agents (magnesium salts of fatty acids, silicon dioxide), zinc citrate, D-pantothenate calcium. **WARNINGS:** Store in a cool, dry place. Heat and sunlight may damage the bottle. Keep out of the reach of children. Use this product in conjunction with food as part of a healthy, balanced diet, not as a substitute for such. Don't exceed the recommended daily dosage. May contain traces of **gluten, milk, egg, soy, celery, sulphur dioxide, sulphites, fish, molluscs and crustaceans.**
